

FISTULA 'ON' AND 'OFF' HAEMODIALYSIS PACKS

Here at Pennine, we pride ourselves on being an innovative, responsive, solution orientated organisation. We are proud to have the facilities to carefully source and manufacture individual components in an ISO 14644-1 compliant cleanroom ready to be packaged and distributed, including our brand-new Fistula 'On' and 'Off' Haemodialysis Packs.

We're delighted to introduce a fully bespoke range of Fistula 'On' and 'Off' Haemodialysis Packs.

These specialised packs contain all the essential single-use components for the safe and effective management of a patient's vascular access site - a critical lifeline for dialysis treatment.

Here at Pennine Healthcare, we tailor pack contents to your specific requirements, ensuring compliance with your protocols and supporting standardised procedures.
